

Cordless & Metalworking 2017

**WORLD'S
FIRST**

**COMING SOON IN TWIN 18 VOLT
WORLD'S FIRST CORDLESS
230mm ANGLE GRINDER**

NEW

Brushless 230mm Angle Grinder WPB 36-18 LTX 230 613102890

LARGE DISC, MEGA POWER, MAXIMUM FREEDOM.

- The first large cordless angle grinder with 230 mm disc - with a cutting depth of up to 77 mm.
- As powerful as a 2,400 Watt mains-powered machine.
- Ultimate freedom thanks to revolutionary LiHD battery pack technology.
- Extremely long service life even in dusty surroundings
- Unique encapsulated Metabo brushless motor with optimised dust protection

Uncompromising user safety

Most accidents with angle grinders are caused by loss of control. Metabo focuses on prevention with numerous safety functions.

- Electronic safety shutdown = Reduced kickback if the disc stops unexpectedly
- Deadman's switch and brake system for Safer disc stop
- Perfect balance, rotating handle, ergonomic gripping surfaces and large control elements for even safer handling when cutting and grinding

Grinding wheel Ø 230 mm
No-load speed 6,600 /min
Output power 1,600 W
Weight (including battery pack) 6.1 kg

***Metabo 3 year unlimited charge cycle battery warranty.** applies from date of purchase. The warranty covers defects in material and/or workmanship only and is subject to terms and conditions of use. www.metabo.com/Warranty-Service.2038.0.html

Ultra M-Technology

Metabo Lithium High Density 6.2Ah

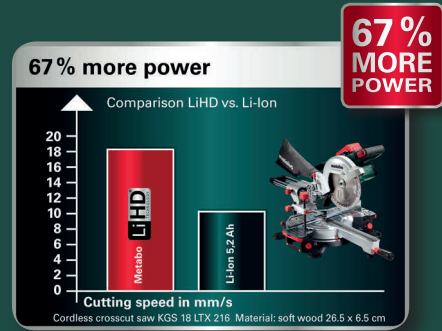

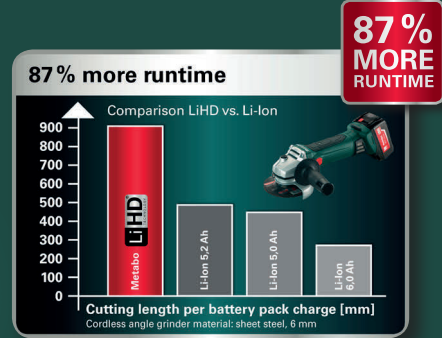

WHAT IS HIGH DENSITY?

Revolutionary LiHD high-performance cells: Completely new electromechanical design with significantly stronger conductors, which in combination with more active material, permit a significant increase in the accessible power output resulting in more usable energy for you

- 67% more power*
- 87% longer run time*
- 100% longer service life*
- Makes applications possible under most demanding conditions, which had previously been reserved only for powerful mains-powered machines.
- New definition of independence: a milestone along the path towards a cordless construction site

Metabo High Performance Lithium

As the demand on the cordless power tool is changing our customers are expecting more. The development of brushless tools have made an inroad to our end goal, but without a power source that can handle the demands of the modern tradesman, power tools will never be able to replace the plug.

Metabo 18V 2.0Ah is an exceptional battery for compact applications.

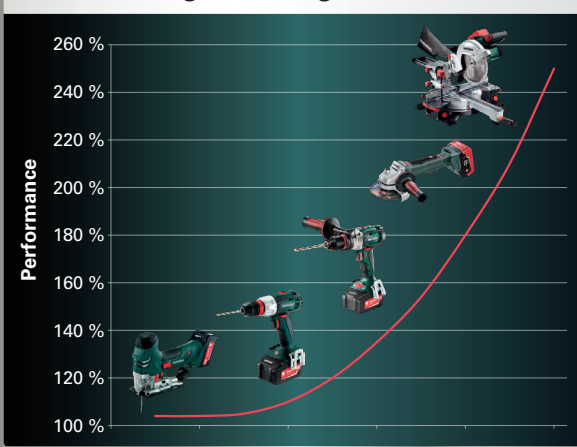

Metabo 18V 5.2Ah is an exceptional battery, and can last almost as long as the Li HD in low to medium demands, such as lighting, blowers, fans, multi tools, drills. The 5.2Ah is still one of the strongest batteries on the market.

Which Battery Do I Need?

All our batteries are market leaders in technology and are suitable for the current 18 volt platform**. High Density batteries are beneficial over the 5.2Ah in an extended high current draw situation.

Performance gain through LiHD

Ultra M-Technology

Metabo Charging Technology

"AIR COOLED" function:

The battery packs are gently cooled down to the required charging temperature, and then during the charging process are constantly maintained at optimum temperature. With this principle, a higher tool life of the battery packs and up to 30% shorter total charging time can be achieved.

Super fast charger

ASC Ultra 18V 627265000

- For charging all Li-Power and LiHD slide-on battery packs (14.4V - 36V).
- Patented "AIR COOLED" charging technology
- Charging current 6.5 A
- Very low stand-by input power
- Processor-controlled charging management system
- Charge time approximately 45 minutes at 5.2Ah

Standard Charger

ASC 30 - 36V 627047000

- For charging all Li-Power and LiHD slide-on battery packs (14.4V - 36V).
- Patented "AIR COOLED" charging technology
- Charging current 2.5 A
- Monitored charging with microcontroller
- Battery diagnosis

*Metabo 3 year unlimited charge cycle battery warranty.

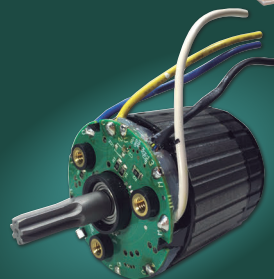

applies from date of purchase. The warranty covers defects in material and/or workmanship only and is subject to terms and conditions of use.

MARATHON MOTOR

Metabo Marathon Motor

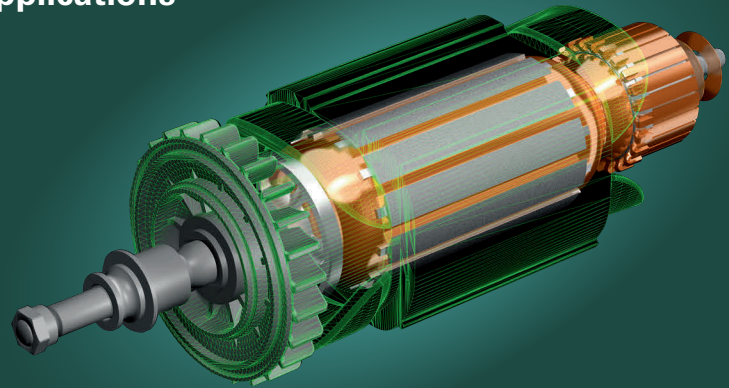

Developed for long service life in extreme applications

Up to 20% higher overload capacity & increased robustness:

- Turbo fans accelerate the cooling air to up to 400 km/h.
- Flow-optimised dust protection cage accelerates dust particles from the machine
- Rear suction vents prevent unintentional covering for longer service life
- New epoxy resin powder around the field coil
- 30% more abrasion protection resin at the rotor winding

Constant high speeds under load for quickest material removal:

- Increased rotor diameter for optimum leverage and up to 50% more torque
- New ventilation technology for significantly reduced average motor temperatures and up to 20% more max. output power

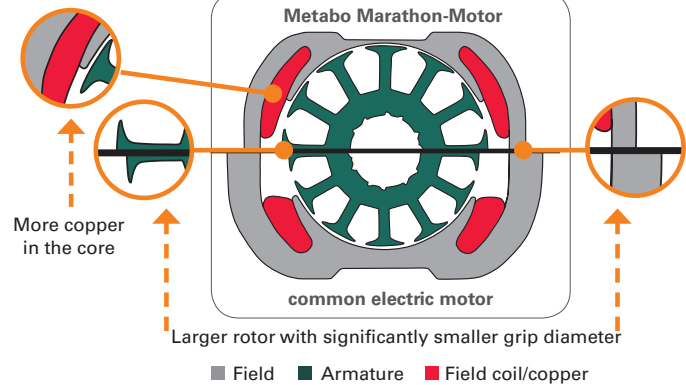

New patented field coil technology

Maximum power with excellent ergonomics

- The new patented field coil technology permits full performance with reduced handle circumference.
- Highest power density in any class
- Low-fatigue and safe working

Cross-section electric motor
